

California OES Weather Threat Briefing

Saturday, October 30, 2021
9:00 AM PDT

Day 1 (Friday): Locally dense fog will be seen again across coastal southern California as well as the northern and central CA valleys through late morning. Showers and a few thunderstorms will also impact far northern California today, with light to moderate rainfall amounts.

National Weather Service

WEATHER KEY POINTS

10/30/21 - 11/05/21

Saturday-Friday

- Locally dense fog will be noted across coastal southern California and some of the valleys of northern and central California through late morning
- Several rounds of showers will impact the state through the weekend and much of next week
 - The first is expected today across far northern California, with generally light rainfall amounts under ½", though locally heavier rainfall is possible as a few thunderstorms occur
 - Second round arrives Sunday night through Monday night, with more beneficial rainfall amounts. No significant impacts are currently, though some briefly heavier rainfall is possible
 - Additional precipitation is possible through late next week as a stronger storm approaches the state. At this time, there is some potential for locally heavy rainfall with this storm, though the exact forecast details remain uncertain.
- Cooler temperatures will be seen statewide through the weekend and much of next week
